

# HiloCAM<sub>2</sub>

Developed by Photographers for Photographers

For 50 years South Midlands Communications has been manufacturing telescopic masts for endless applications. The development in recent years has moved into providing our customers with a single source complete packaged system.

The combination of experience in designing and building masts and in-house photographic knowledge produced the **HiloCAM** system. Further developing these ideas and listening to our customers desires produced the **HiloCAM<sub>2</sub>**, a fully remote controlled digital SLR aerial photography system.

Controlling and shooting aerial photographs couldn't be simpler!

# The System

## Robustly Built For The Demanding Marketplace

Spent lots of money on your camera? Don't risk losing your investment by cutting corners.

The **HiloCAM<sub>2</sub>**, from South Midlands Communications provides the ideal platform for your digital SLR. Using a strong yet lightweight die cast aluminium pan and tilt unit gives you confidence to deploy your camera on top of a mast up to staggering heights of 100ft.

## Pan/Tilt, Zoom, Compose And Shoot, Simplicity At Your Fingers

The new **HiloCAM<sub>2</sub>** system incorporates a 3-axis joystick, which allows you to pan, tilt and zoom the camera system using one hand. Compose and shoot your image using the LCD display, which gives a live video feed looking through the viewfinder.

Connecting the controller via the USB cable to your computer automatically transfers images to your desktop during your photo shoot for fast on-site post processing and printing.

## Shoot RAW Using The Latest Digital SLR

Using the latest Canon and Nikon Digital SLR cameras can have fully motorised zoom capabilities along with the 10 million pixel resolution already offered by these models. Outstanding results can be achieved with this combination.

*Due to ever changing camera technologies compatible camera's are always changing, contact us for a list of system compatibilities.*
